ABOUT HYBRID WORKSPACE

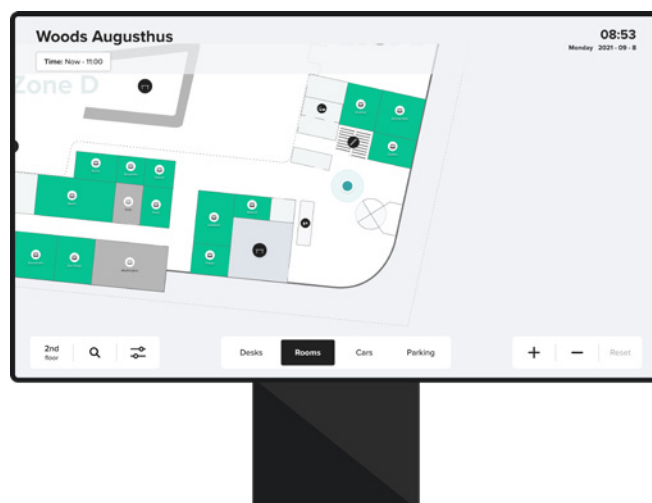

The Hybrid Workspace solution from Fischer & Kern is without a doubt the perfect tool for an overall smoother everyday workflow!

Arriving at a large office space can be stressful and leave employees, consultants, and guests with a feeling of unease. This feeling can come from not knowing where to go, and on what floor/ area your booked desk or meeting room is located. Having a large touch screen in your office can act as a welcoming hand. It easily creates the needed overview, for those entering your office building.

Hybrid Workspace from Fischer & Kern is a sublime overview & booking screen solution. It provides a complete overview of different floors, buildings, meeting rooms, and desk groups. The solution is a great optimization tool, because it can save your employees and guests a lot of time. The information provided by the Hybrid Workspace software is valuable, as it visually demonstrates where your booked office resources are located in a manageable design on the screen!

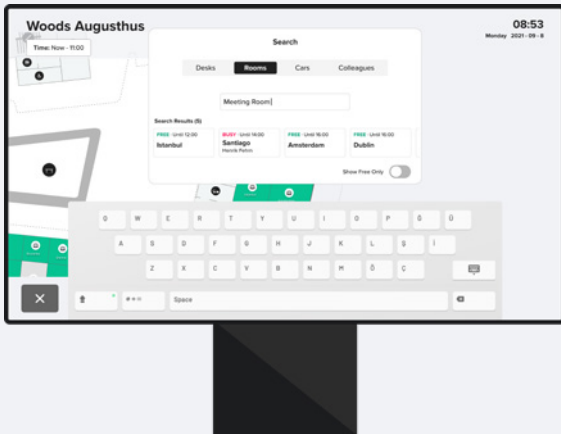

With Hybrid Workspace touch screens you can even book meeting rooms, desks and other resources - or search for where your colleagues are located in the office space.

Apart from providing overview of your office, the Hybrid Workspace solution can also function as a branding component in your office. The professional appearance of the screen makes it fit smoothly into any office space. It truly adds a modern look and feel, which will leave your guests impressed!

SELECTED POSSIBILITIES

WAYFINDING & SEARCH OPTIONS

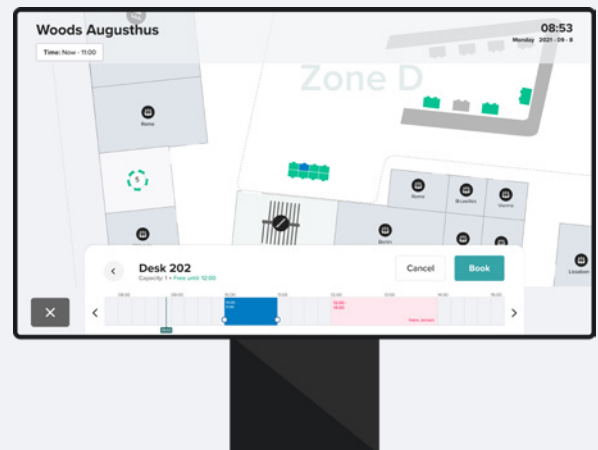

The Hybrid Workspace offer clear wayfinding. It can map out the easiest and fastest way to get to where you need to go. You can even search for and find your colleagues. This can certainly come in handy! For example, if you want to book a desk close to them or need to know where they are seated.

Further, you can use the Hybrid Workspace screen to actively search for desks, meeting rooms, or other office resources. This can be valuable if you want to check availability status throughout the day. Having information about available office resources makes it possible to plan out your day. It allows you to take advantage of the unoccupied resources.

BOOK FROM OVERVIEW SCREENS

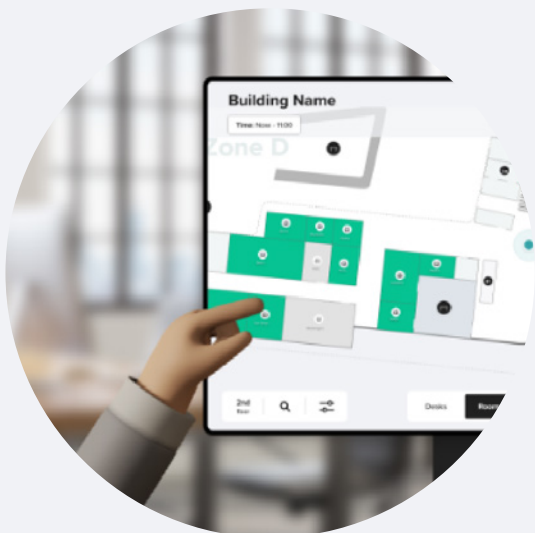

Booking office resources from an overview screen, allows you to choose exactly where in the office space you want to work from.

When booking – e.g. a desk – you just select the resource you want to book and a specific timeslot. Your booking will then be waiting for you. Now you can safely grab a coffee or say hi to a colleague on the way to your booked seating without risking the desk being occupied when you arrive at it.

USER AUTHENTICATION

It is possible to set up user authentication via either integration to your RFID ID cards or through a personal pin code. This makes the booking process super smooth and allows you to see which employees are in the office building.

CONTACT INFORMATION

ABOUT FISCHER & KERRN

We create frictionless and unique workplaces for our customers by providing them with innovative and user-friendly software booking tools. We have been in the workplace optimization and conference room booking software business since 1999 and today we have more than 500 satisfied customers that are using CONCIERGE BOOKING SOFTWARE.
