Room Capacity

The Fischer & Kerrn Room Panel Orion is a superb designed Room Panel made to match the simple yet cool office area.

The bright LED-light shows the occupancy status of the meeting room – in a subtle manner. You can easily see the LED-light from all angels which is super convenient and creates a immediate overview – especially if you are in a hurry.

The LED lights can be set according to your needs. The lights can indicate with green, red and amber if the room is available, occupied or soon will be occupied. The lights can also flash when a check-in is needed.

The bright and modern layout is designed to make it easy to book the meeting rooms and get information about availability, upcoming meetings, capacity and nearby available rooms.
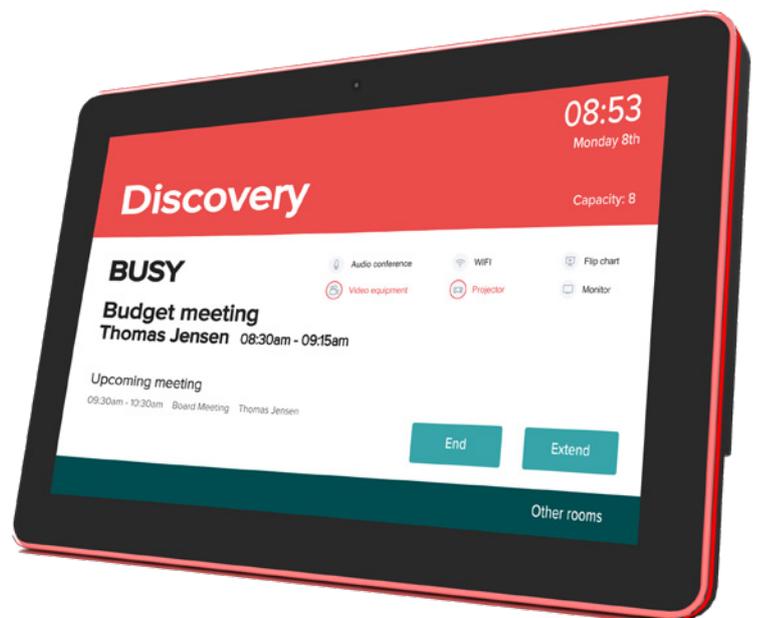

The Room Panel comes with a central management tool that allows you to manage all your devices remotely.

LAYOUT POSSIBILITIES

Your corporate identity can be incorporated and customized in the layout.
Our designers can help to create the layout so it matches
your professional expression.

CENTRAL MANAGEMENT

Set opening hours, update firmware and much more!

Easy administration of your conference room displays is important and timesaving.

All your Fischer & Kerrn Room Panels are managed from a central administration tool where you can set opening hours on your screens, see status on your room panels and push out new meeting room links if updates are necessary.

If you need to reboot a screen or update firmware, it can of course also be done from the administration tool.
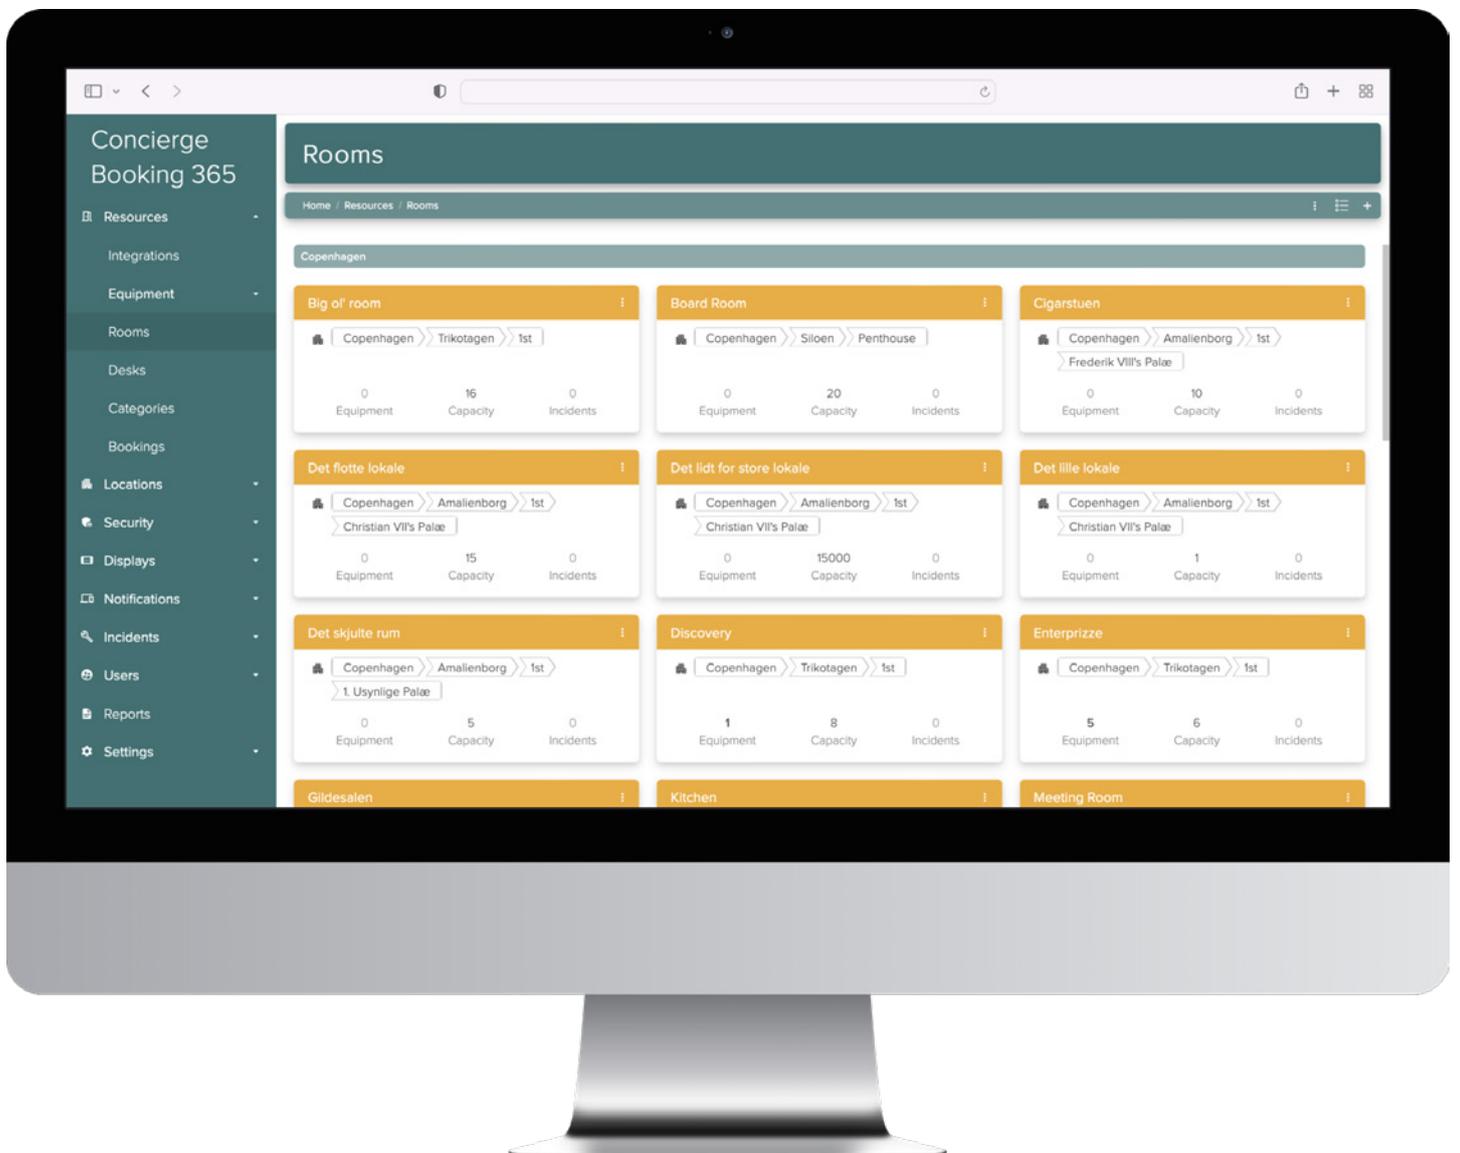

TECHNICAL SPECIFICATIONS

Booking Software:

The Room Panels come without booking software installed. We recommend for you to purchase our software **Concierge Display Rooms**, and experience full flexibility to manage all functions on the screen.

Specifications:

Operating System	Android 11
